

KAF1412EDC

PUBLIC ADDRESS REMOTE MICROPHONE CONTROLLER

The KAF1412EDC Remote Microphone Controller is designed to be used in conjunction with a KAB3240M Mixer Amplifier (KAR6103 Interface module is required).

This controller is a table-top microphone, sturdy, ascetically pleasing and easy to use.

It allows a microphone message or digitally pre-recorded message to be broadcast into one or more pre-selected zones.

The zones are selected by pressing the corresponding push-button. A LED will indicate the zone selection.

An "All Call" button is also provided to facilitate the paging process.

A rotary control switch allows the remote control (play, repeat and stop) of the six pre-recorded messages stored into the KAK2111T Digital Recorder module (optional module inserted into the KAB3240M).

The microphone has a uni-directional, electret capsule providing a clear and high quality vocal message.

A chime (2 tone or 4 tone) automatically operates.

A stereo RCA (cinch) input allows connection of a remote music source to the system.

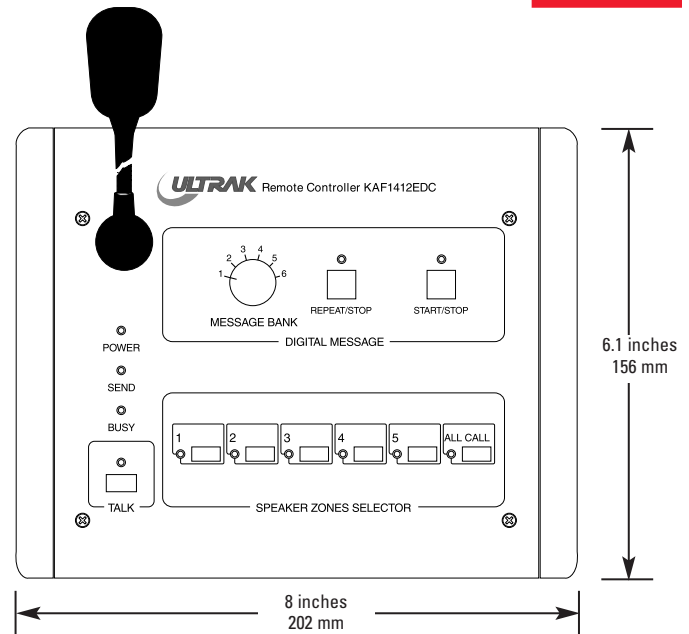

- Electret uni-directional microphone
- Line level balanced output
- 5 Zone paging + "All Call"
- Remote control of 6 pre-recorded digital messages
- Selectable chime (On/Off, 2 tones, 4 tones)
- LED's indicate zone selection
- Stereo cinch input for auxiliary source
